

# Dual Deployment Complete: Vercel + Hostinger

## What I've Added

### 1. Hostinger GitHub Actions Deployment

- **Created:** `.github/workflows/hostinger-deploy.yml`
- **Automatic FTP deployment** to Hostinger on every push
- **Production-optimized build** with correct domain references
- **Parallel deployment** with Vercel (both run simultaneously)

### 2. Apache Configuration

- **Created:** `public/.htaccess` for React SPA routing
- **Features:** URL rewriting, security headers, Gzip compression, caching
- **HTTPS redirect** and performance optimizations

### 3. Updated Domain References

- **Updated:** `build-hostinger.sh` to use `FindBrexitConsultants.co.uk`
- **Updated:** `HOSTINGER_DEPLOYMENT.md` with correct domain
- **All references** now use the capitalized domain format

### 4. Comprehensive Documentation

- **Created:** `HOSTINGER_GITHUB_ACTIONS_SETUP.md` - Complete setup guide
- **Created:** `DUAL_DEPLOYMENT_GUIDE.md` - Overview of both deployment options

- **Step-by-step instructions** for configuring GitHub secrets

## Deployment Architecture

```
GitHub Push → GitHub Actions → [Vercel Deploy] + [Hostinger Deploy]
                                   ↓               ↓
                                   Vercel Preview
FindBrexitConsultants.co.uk
```

## Required GitHub Secrets

### For Vercel:

- VERCEL\_TOKEN
- VERCEL\_ORG\_ID
- VERCEL\_PROJECT\_ID

### For Hostinger:

- HOSTINGER\_FTP\_HOST
- HOSTINGER\_FTP\_USERNAME
- HOSTINGER\_FTP\_PASSWORD
- VITE\_SUPABASE\_URL
- VITE\_SUPABASE\_ANON\_KEY

## Next Steps

### 1. Push to GitHub:

```
bash cd /workspace/findbrexit-consultants git push -u origin master
```

### 2. Configure Hostinger FTP credentials in GitHub secrets

### 3. Configure Vercel credentials in GitHub secrets

### 4. Every push will now deploy to BOTH platforms automatically!

## Benefits

-  **Redundant hosting** (Vercel + Hostinger)
-  **Zero-downtime deployments**
-  **Automatic builds** on every commit
-  **Production-ready configuration**
-  **SEO optimized** (.htaccess, robots.txt, sitemap)
-  **Security headers** and performance optimizations

## Live URLs

After configuration:

- **Production:** <https://FindBrexitConsultants.co.uk> (Hostinger)
- **Preview:** [Vercel-generated URL] (Vercel)

Your FindBrexitConsultants.co.uk project now has enterprise-level CI/CD deployment to both Vercel and Hostinger!
